

THE FUTURE OF PRECISION AND PREDICTIVE HEALTHCARE

May 24 | 4:00 – 6:30 pm PDT

May 25 | 8:00 – 10:30 am JT

Online Event

One important quest of healthcare is to prevent adverse events in individuals. The pandemic has been a worldwide tragedy but triggered innovation in the healthcare industry – such as the growth of telemedicine and the use of AI in real-time monitoring – which offer the opportunity to predict adverse events in patients.

At this exciting event we will welcome Dr. Lloyd Minor as our keynote speaker to explain the future of medicine. Additionally, we will feature Japanese companies interested in advancing this concept and also interested in expanding their business and strategic partnerships in the U.S. and globally.

KEYNOTE SPEAKER

LLOYD B. MINOR

Dean of Stanford University
School of Medicine

Lloyd B. Minor, MD, is a scientist, surgeon, and academic leader. He is the Dean of the Stanford University School of Medicine and author of the 2020 book "Discovering Precision health: Predict, Prevent, and Cure to Advance Health and Well-Being."
